Re: Pratt and Whitney Aircraft Group, East Hartford,
Connecticut - EPA I.D. No. CTD000672081

Dear Mr. Dews:

I have just reviewed the November 26, 1985 Part B revisions from Pratt and Whitney and am now satisfied that the Part B application is complete. The company's decision to close the liquid injection incinerator greatly simplifies the permit information requirements. This latest submittal, in my mind, satisfies those requirements. The final decision rests with you.

In regards to the closure of the incinerator, if Pratt and Whitney can demonstrate that hazardous waste was never burned, closure activities are not required. The unit will be addressed as a "protective filer". If this demonstration cannot be made, the unit must be closed per the closure plan in the Part B application.

Please let me know of your decision as to the completeness of Pratt and Whitney's Part B application. Also, please keep me informed of any developments regarding the incinerator closure.

I can be reached at (617) 223-5902 for questions or comments.

Sincerely,

Andrew Hoffman, Chemical Engineer
CT/RI Waste Programs Section
